

## Redefining stability and comfort: The latest patient-specific overdenture solution

The goal of this program is to give clinicians the latest information and tools necessary to succeed in integrating innovative edentulous treatment procedures into their practices.

You will learn the latest about friction-retained patient-specific overdenture solutions and how they are gaining popularity. The concept uses rigid telescopic principles to give your patients a pure implant-borne, palate free, removable result that is easy to clean. Integrating precision technology with today's patient's needs provides them the functionality and esthetics they demand and makes removable dentistry enjoyable again!

### This program will also include a hands-on session.

At the completion of this course, participants will be able to understand:

- A proven alternative for the treatment of the edentulous patient; a healthier, more esthetic, and maintainable approach.
- Proper implant diagnostics: a collaborative approach.
- Step-by-step instructions for the clinical team.
- Removable hybrid and overdenture fabrication and esthetics.

## Registration

To register for this program contact Valerie Gorgol at **630-369-4600** or [valg@ddsltdlab.com](mailto:valg@ddsltdlab.com).

Please respond soon as space is limited.

## Featured speaker

**Dr. Jon Copeland** is a 2009 graduate of UMKC School of Dentistry. Following dental school, he completed a general practice residency at the University of Nebraska Medical Center where he received advanced education in trauma and comprehensive dentistry in a multidisciplinary practice and hospital setting. He has been in private practice in St. Louis since 2010.

Dr. Copeland and his wife Stephanie, also a dentist, have an office in West St. Louis County and were named to the "40 Under 40" by Incisal Magazine in 2018. Dr. Copeland has achieved fellowship in the Academy of General Dentistry as well as honorary fellowship in the American College of Dentists, International College of Dentists and the Pierre Fauchard Academy. He has been honored for his humanitarian and leadership efforts by many dental organizations and was named one of the "10 Under 10" by the American Dental Association recognizing dentistry's rising stars in 2018. Dr. Copeland has led a SPEAR study club for over five years and has focused his practice to managing complex dental implant restorations and comprehensive dental rehabilitations.

Speaker Disclosure: Speaker is being compensated by Dentsply Sirona for this event, but does not have monetary or other interest(s) with Dentsply Sirona or any other company whose products are discussed or presented in this presentation.
