

THE PATIENT EXPERIENCE

A Certified Dental Technician will determine your tooth shade and specifications. It will later be fabricated and returned to your doctor's office in a timely manner.

Distinctive Dental Studio, Ltd. has a stellar record of OSHA Compliance including Infection Control.

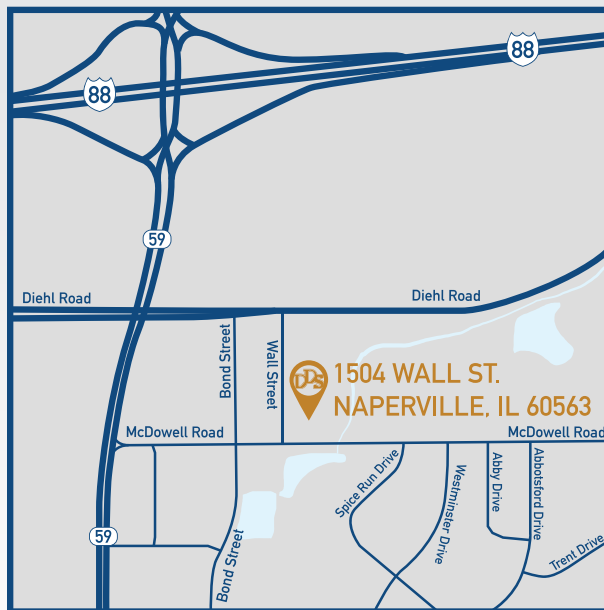

Sterile procedures are followed to ensure patient safety.

Patient Testimonial:

The process is fast and easy! The Dental Technician was courteous and highly professional and made me feel like my mouth is the most important thing in the lab. My restoration came out beautifully and I feel confident about my smile again! Thank you Distinctive Dental Studio, Ltd.!

YOU'RE HAVING A CUSTOM SHADE TAKEN AT YOUR DOCTOR'S REQUEST

SCHEDULE YOUR APPOINTMENT:

- Call Distinctive Dental Studio, Ltd. to set up your appointment 630.369.4600
- Estimate 10 to 20 minutes for your appointment (based upon complexity and patient satisfaction needs)

HOURS: MON - FRI 9AM - 4PM
(See map on back)

PRIOR TO YOUR APPOINTMENT:

- Stop any whitening products at least **2-3 weeks** prior to your custom shade appointment

DAY OF YOUR APPOINTMENT:

- Wear a plain white or gray shirt if possible (due to chroma during shade selection)
- Do not wear lipstick, lip balm or bright make-up
- Do not drink dark liquids the morning prior to your appointment

WHAT TO EXPECT:

Your custom shade match is performed by a highly skilled, experienced Certified Dental Technician trained in the art of Cosmetics (also known as a Master Ceramist).

We delight in seeing you happy and confident with your new restoration. That is why we promise to listen to your needs and expectations!

Our Custom Shade Room offers the warmth of an antique Barber's Chair. It is our desire to pay homage to the history of dentistry and the Barber's Chair is where it all began. Patients are delighted when they see the melding of the past with the technological advancements of the future.

THE PROCESS:

1. A Master Ceramist will record/assess the shade, size, length, bite, look, and correct symmetry in the mouth of your future restoration in relation to your other teeth.

2. Photographs are taken with a powerful telephoto zoom lens. Photos are later used to fabricate your restoration.

3. You're all done!

Occasionally, it is necessary to return to the lab with your restoration for a 2nd appointment. This doubly ensures it is perfectly matched according to your natural dentition. Any modifications are done on-site. The shade is also checked in natural sunlight; or in inclement weather, with a special color-corrected light.
